DETAILED ACTION

2. Claims 1, 3, and 6-17 have been amended.
3. Claims 2, 4, and 5 have been cancelled.
4. Claims 18-21 have been added.
5. Claims 1, 3, and 6-21 have been examined.

Previous Claim Objections

6. Claims 1 and 9 were objected to because of informalities. The Examiner thanks the Applicant for correcting the minor deficiencies in the claim language and hereby withdraws the objections.

Previous Claim Rejections - 35 USC § 112

7. Claims 1-8 were rejected under 35 USC § 112. The Examiner thanks the Applicant for correcting the minor deficiencies in the claim language and hereby withdraws the rejections under 35 USC § 112.

RESPONSE TO ARGUMENTS

8. Applicant's arguments received on have been fully considered but they are not persuasive. Referring to the previous Office action, Examiner has cited relevant portions of the references as a means to illustrate the systems as taught by the prior art. As a means of providing further

clarification as to what is taught by the references used in the first Office action, Examiner has expanded the teachings for comprehensibility while maintaining the same grounds of rejection of the claims, except as noted above in the section labeled "Status of Claims." This information is intended to assist in illuminating the teachings of the references while providing evidence that establishes further support for the rejections of the claims.

With regard to the limitations of claim 1, Applicant argues that there is no teaching or suggestion in the cited reference of a calculation or a processing of a settlement as in the recitations of the claims. The Examiner respectfully points to the Applicant's specification. In the background the Applicant discloses that this is a known step during a POS transaction.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

10. Claims 13, 4, 6-17 are rejected under 35 U.S.C. 102(a) as being anticipated by Smith et al. (US 6,487,540 B1).

Examiner's note: Examiner has pointed out particular references contained in the prior art of record in the body of this action for the convenience of the Applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply. Applicant, in preparing the response, should consider fully the *entire* reference as potentially teaching all or part of the

claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.
